To Whom It May Concern:

I would like to express my interest in applying for the internship position in engineering within Turkney Modular.

I am currently pursuing my Bachelor degree in Mechatronics Engineering at Waterloo University. I have developed a strong foundation in engineering principles, along with hands-on experience in robotics and project management.

During my academic journey, I have successfully led projects such as the Tic-Tac-Toe Robot, where I designed and programmed a robot using the LEGO EV3 platform. This required not only technical skills in programming and design but also a collaborative spirit as I engaged in ideation and iterative testing. Additionally, my involvement with Waterloo Formula Electric has fortified my capabilities in cross-disciplinary teamwork, allowing me to communicate effectively with engineers from various specialties, a quality I understand is vital for success as an Engineer. I am eager to bring my design skills, adaptability, and resourcefulness to the team.

I am very enthusiastic, motivated, and have a relentless work ethic. I have a great amount of energy, insight, and natural leadership ability that cannot be matched by other candidates. If given the opportunity, I promise you success and achievement. Thank you in advance for your consideration.

Sincerely,

Shilo Jeyarajasingam
